

Purfling Marker

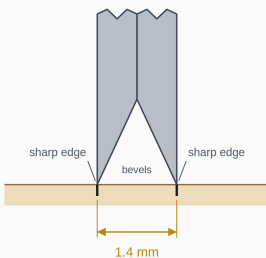

A double-blade purfling marker in solid brass

- 1 Working face
- 2 Blades
- 3 Thumbwheel
- 4 Locking knob
- 5 Blade clamp screw

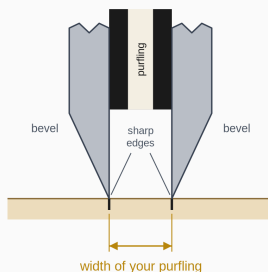

- Thumbwheel adjustment, 0.5 mm per turn, with locking knob
- Set for 1.5 mm purfling; reverse the blades for any other width
- Solid brass, hand assembled in Britain

As supplied: 1.5 mm purfling

Bevels inside, sharp edges outside.
Lines marked 1.4 mm apart.

Any other purfling

Blades reversed, a piece of your purfling
clamped between the sharp edges.

Using the marker

- 1 Sharpen the blades first: they are supplied unsharpened.
- 2 **Always undo the locking knob before turning the thumbwheel.**
- 3 Set the margin with the thumbwheel (0.5 mm per turn), then tighten the locking knob.
- 4 Test on scrap wood before marking the instrument.

I found one of these markers at a second-hand tool sale and loved it. My tutor, Shem Mackey, uses two of them together, but I couldn't find a second one, so I decided to make them.

Based on the original design by Brian Hart and Shem Mackey, and made with the generous permission of Shem Mackey and of Brian's son, Steve Hart.

Supplied in a fitted case with a 2 mm hex key.

£99
